

計算をしましょう。

$$(1) \frac{4}{5} - \frac{1}{5} = \frac{3}{5}$$

$$(2) \frac{5}{7} - \frac{2}{7} = \frac{3}{7}$$

$$(3) \frac{3}{4} - \frac{2}{4} = \frac{1}{4}$$

$$(4) \frac{5}{6} - \frac{3}{6} = \frac{2}{6}$$

$$(5) \frac{6}{7} - \frac{3}{7} = \frac{3}{7}$$

$$(6) \frac{7}{8} - \frac{2}{8} = \frac{5}{8}$$

$$(7) \frac{7}{9} - \frac{3}{9} = \frac{4}{9}$$

$$(8) \frac{8}{10} - \frac{5}{10} = \frac{3}{10}$$

$$(9) \frac{5}{7} - \frac{2}{7} = \frac{3}{7}$$

$$(10) \frac{5}{8} - \frac{5}{8} = 0$$
