

計算をしましょう。

$$(1) \frac{10}{11} - \frac{7}{11} = \frac{3}{11}$$

$$(2) \frac{8}{12} - \frac{3}{12} = \frac{5}{12}$$

$$(3) \frac{13}{15} - \frac{7}{15} = \frac{6}{15}$$

$$(4) \frac{15}{18} - \frac{8}{18} = \frac{7}{18}$$

$$(5) \frac{11}{13} - \frac{4}{13} = \frac{7}{13}$$

$$(6) \frac{14}{15} - \frac{7}{15} = \frac{7}{15}$$

$$(7) \frac{15}{17} - \frac{9}{17} = \frac{6}{17}$$

$$(8) \frac{12}{14} - \frac{7}{14} = \frac{5}{14}$$

$$(9) \frac{15}{16} - \frac{6}{16} = \frac{9}{16}$$

$$(10) \frac{17}{20} - \frac{9}{20} = \frac{8}{20}$$
