

計算をしましょう。

$$(1) \frac{11}{12} - \frac{3}{12} = \frac{8}{12}$$

$$(2) \frac{15}{15} - \frac{7}{15} = \frac{8}{15}$$

$$(3) \frac{6}{11} - \frac{6}{11} = 0$$

$$(4) \frac{17}{17} - \frac{9}{17} = \frac{8}{17}$$

$$(5) \frac{13}{18} - \frac{5}{18} = \frac{8}{18}$$

$$(6) \frac{13}{13} - \frac{4}{13} = \frac{9}{13}$$

$$(7) \frac{14}{16} - \frac{7}{16} = \frac{7}{16}$$

$$(8) \frac{19}{19} - \frac{12}{19} = \frac{7}{19}$$

$$(9) \frac{11}{14} - \frac{2}{14} = \frac{9}{14}$$

$$(10) \frac{20}{20} - \frac{13}{20} = \frac{7}{20}$$
