

計算をしましょう。

$$(1) \frac{17}{18} - \frac{8}{18} = \frac{9}{18}$$

$$(2) \frac{12}{12} - \frac{5}{12} = \frac{7}{12}$$

$$(3) \frac{12}{13} - \frac{7}{13} = \frac{5}{13}$$

$$(4) \frac{18}{18} - \frac{9}{18} = \frac{9}{18}$$

$$(5) \frac{15}{17} - \frac{9}{17} = \frac{6}{17}$$

$$(6) \frac{11}{11} - \frac{4}{11} = \frac{7}{11}$$

$$(7) \frac{13}{14} - \frac{6}{14} = \frac{7}{14}$$

$$(8) \frac{16}{16} - \frac{11}{16} = \frac{5}{16}$$

$$(9) \frac{17}{20} - \frac{9}{20} = \frac{8}{20}$$

$$(10) \frac{15}{15} - \frac{8}{15} = \frac{7}{15}$$
