

計算をしましょう。

$$(1) \frac{1}{7} + \frac{3}{7} = \frac{4}{7}$$

$$(2) \frac{3}{5} + \frac{1}{5} = \frac{4}{5}$$

$$(3) \frac{3}{6} + \frac{2}{6} = \frac{5}{6}$$

$$(4) \frac{2}{8} + \frac{5}{8} = \frac{7}{8}$$

$$(5) \frac{2}{3} + \frac{1}{3} = \frac{3}{3} \\ = 1$$

$$(6) \frac{4}{9} + \frac{3}{9} = \frac{7}{9}$$

$$(7) \frac{3}{7} + \frac{3}{7} = \frac{6}{7}$$

$$(8) \frac{5}{10} + \frac{2}{10} = \frac{7}{10}$$

$$(9) \frac{4}{6} + \frac{2}{6} = \frac{6}{6} \\ = 1$$

$$(10) \frac{3}{9} + \frac{6}{9} = \frac{9}{9} \\ = 1$$
