

計算をしましょう。

$$(1) \quad \frac{3}{2} - \frac{1}{2} = \frac{2}{2} \\ = 1$$

$$(2) \quad \frac{7}{3} - \frac{4}{3} = \frac{3}{3} \\ = 1$$

$$(3) \quad \frac{9}{4} - \frac{5}{4} = \frac{4}{4} \\ = 1$$

$$(4) \quad \frac{15}{6} - \frac{3}{6} = \frac{12}{6} \\ = 2$$

$$(5) \quad \frac{20}{7} - \frac{6}{7} = \frac{14}{7} \\ = 2$$

$$(6) \quad \frac{39}{8} - \frac{7}{8} = \frac{32}{8} \\ = 4$$

$$(7) \quad \frac{49}{9} - \frac{4}{9} = \frac{45}{9} \\ = 5$$

$$(8) \quad \frac{55}{10} - \frac{5}{10} = \frac{50}{10} \\ = 5$$

$$(9) \quad \frac{38}{5} - \frac{3}{5} = \frac{35}{5} \\ = 7$$

$$(10) \quad \frac{61}{8} - \frac{5}{8} = \frac{56}{8} \\ = 7$$
