

次の計算しましょう。 ※かけ算・割り算は先に計算する

$$\textcircled{1} 18 - 12 \div 3 + 2 = 18 - 4 + 2 = 16$$

$\underbrace{12 \div 3}_{4} \quad 14 + 2 =$

$$\textcircled{2} 25 + 7 \times 6 - 5 = 25 + 42 - 5 = 62$$

$\underbrace{7 \times 6}_{42} \quad 67 - 5 =$

$$\textcircled{3} 34 + 36 \div 4 - 12 = 34 + 9 - 12 = 31$$

$\underbrace{36 \div 4}_{9} \quad 43 - 12 =$

$$\textcircled{4} 74 - 63 \div 9 \times 5 = 74 - 35 = 39$$

$\underbrace{63 \div 9}_{7} \quad \underbrace{7 \times 5}_{35}$

$$\textcircled{5} 150 - 100 \div 25 \times 3 = 150 - 12 = 138$$

$\underbrace{100 \div 25}_{4} \quad \underbrace{4 \times 3}_{12}$

$$\textcircled{6} 180 + 13 \times 4 \div 2 = 180 + 26 = 206$$

$\underbrace{13 \times 4}_{52} \quad \underbrace{52 \div 2}_{26}$
