

次の計算をしましょう。

$$(1) \frac{1}{3} \times 2 = \frac{\boxed{1} \times \boxed{2}}{3} = \frac{\boxed{2}}{3}$$

$$(2) \frac{2}{7} \times 3 = \frac{\boxed{2} \times \boxed{3}}{7} = \frac{\boxed{6}}{7}$$

$$(3) \frac{4}{9} \times 2 = \frac{4 \times 2}{9} = \frac{8}{9}$$

$$(4) \frac{2}{15} \times 7 = \frac{2 \times 7}{15} = \frac{14}{15}$$

$$(5) \frac{6}{7} \times 9 = \frac{6 \times 9}{7} = \frac{54}{7}$$

$$(6) \frac{7}{5} \times 8 = \frac{7 \times 8}{5} = \frac{56}{5}$$
