

次の計算をしましょう。

$$(1) \frac{2}{9} \times 4 = \frac{\boxed{2} \times \boxed{4}}{9} = \frac{\boxed{8}}{9}$$

$$(2) \frac{3}{16} \times 5 = \frac{\boxed{3} \times \boxed{5}}{16} = \frac{\boxed{15}}{16}$$

$$(3) \frac{4}{17} \times 3 = \frac{4 \times 3}{17} = \frac{12}{17}$$

$$(4) \frac{5}{21} \times 4 = \frac{5 \times 4}{21} = \frac{20}{21}$$

$$(5) \frac{7}{25} \times 3 = \frac{7 \times 3}{25} = \frac{21}{25}$$

$$(6) \frac{4}{37} \times 9 = \frac{4 \times 9}{37} = \frac{36}{37}$$
