

計算をしましょう。

$$(1) \quad \frac{2}{30} + \frac{5}{6} =$$
$$\frac{2}{30} + \frac{25}{30} = \frac{27}{30}$$

$$(2) \quad \frac{7}{40} + \frac{3}{8} =$$
$$\frac{7}{40} + \frac{15}{40} = \frac{22}{40}$$

$$(3) \quad \frac{5}{9} + \frac{5}{36} =$$
$$\frac{20}{36} + \frac{5}{36} = \frac{25}{36}$$

$$(4) \quad \frac{7}{28} + \frac{6}{7} =$$
$$\frac{7}{28} + \frac{24}{28} = \frac{31}{28}$$

$$(5) \quad \frac{5}{26} + \frac{6}{13} =$$
$$\frac{5}{26} + \frac{12}{26} = \frac{17}{26}$$

$$(6) \quad \frac{7}{15} + \frac{11}{30} =$$
$$\frac{14}{30} + \frac{11}{30} = \frac{25}{30}$$

$$(7) \quad \frac{9}{17} + \frac{5}{34} =$$
$$\frac{18}{34} + \frac{5}{34} = \frac{23}{34}$$

$$(8) \quad \frac{5}{77} + \frac{2}{11} =$$
$$\frac{5}{77} + \frac{14}{77} = \frac{19}{77}$$

$$(9) \quad \frac{3}{32} + \frac{9}{16} =$$
$$\frac{3}{32} + \frac{18}{32} = \frac{21}{32}$$

$$(10) \quad \frac{9}{10} + \frac{8}{30} =$$
$$\frac{27}{30} + \frac{8}{30} = \frac{35}{30}$$
