

計算をしましょう。

$$(1) \quad \frac{3}{5} + \frac{3}{12} =$$
$$\frac{36}{60} + \frac{15}{60} = \frac{51}{60}$$

$$(2) \quad \frac{5}{6} + \frac{3}{4} =$$
$$\frac{10}{12} + \frac{9}{12} = \frac{19}{12}$$

$$(3) \quad \frac{3}{5} + \frac{5}{9} =$$
$$\frac{27}{45} + \frac{25}{45} = \frac{52}{45}$$

$$(4) \quad \frac{3}{4} + \frac{2}{9} =$$
$$\frac{27}{36} + \frac{8}{36} = \frac{35}{36}$$

$$(5) \quad \frac{2}{3} + \frac{6}{7} =$$
$$\frac{14}{21} + \frac{18}{21} = \frac{32}{21}$$

$$(6) \quad \frac{2}{7} + \frac{5}{6} =$$
$$\frac{12}{42} + \frac{35}{42} = \frac{47}{42}$$

$$(7) \quad \frac{1}{2} + \frac{7}{9} =$$
$$\frac{9}{18} + \frac{14}{18} = \frac{23}{18}$$

$$(8) \quad \frac{7}{8} + \frac{4}{5} =$$
$$\frac{35}{40} + \frac{32}{40} = \frac{67}{40}$$

$$(9) \quad \frac{3}{7} + \frac{3}{5} =$$
$$\frac{15}{35} + \frac{21}{35} = \frac{36}{35}$$

$$(10) \quad \frac{5}{8} + \frac{2}{3} =$$
$$\frac{15}{24} + \frac{16}{24} = \frac{31}{24}$$
