

次の図形の面積は、それぞれ（ ）のとおりです。□にあてはまる数を求めましょう。

$$5 \times \square = 35$$

$$\square = 35 \div 5 = 7$$

答え 7 cm

$$\square \times 12 = 72$$

$$\square = 72 \div 12 = 6$$

答え 6 cm

$$\textcircled{1} 11 \times 4 = 44$$

$$\textcircled{2} 104 - 44 = 60 \quad \text{②の面積}$$

$$\square \times 10 = 60$$

$$\square = 60 \div 10 = 6$$

答え 6 cm

$$\textcircled{1} 20 - 12 = 8 \quad \text{①横の長さ}$$

$$6 \times 8 = 48 \quad \text{①の面積}$$

$$\textcircled{2} 168 - 48 = 120 \quad \text{②の面積}$$

$$\square \times 12 = 120$$

$$\square = 120 \div 12 = 10$$

答え 10 cm
