

次の計算をしましょう。

$$(1) \frac{1}{4} + 0.2 = \frac{1}{4} + \frac{\cancel{2}^1}{\cancel{10}_5} = \frac{5}{20} + \frac{4}{20} = \frac{9}{20}$$

$$(2) \frac{1}{3} + 0.3 = \frac{1}{3} + \frac{3}{10} = \frac{10}{30} + \frac{9}{30} = \frac{19}{30}$$

$$(3) 0.4 + \frac{2}{5} = \frac{\cancel{4}^2}{\cancel{10}_5} + \frac{2}{5} = \frac{4}{5}$$

$$(4) 0.7 + \frac{1}{8} = \frac{7}{10} + \frac{1}{8} = \frac{28}{40} + \frac{5}{40} = \frac{33}{40}$$

$$(5) \frac{2}{7} + 0.5 = \frac{2}{7} + \frac{\cancel{5}^1}{\cancel{10}_2} = \frac{4}{14} + \frac{7}{14} = \frac{11}{14}$$

$$(6) 0.25 + \frac{2}{5} = \frac{\cancel{25}^1}{\cancel{100}_4} + \frac{2}{5} = \frac{5}{20} + \frac{8}{20} = \frac{13}{20}$$
